Server Administrator • Cloud & Devops

EXPERIENCE

Veeble Softtech Pvt. Ltd.

Aug 2025 – Present

Junior Server Administrator

Kochi, Kerala

- Managed and supported a production hosting infrastructure consisting of **6 virtualization nodes (4 KVM and 2 OpenVZ) hosting 1,200+ VPS instances**, performing node-level troubleshooting, resource monitoring, and virtualization issue analysis
- Administered **2 CloudLinux cPanel/WHM shared hosting servers, 1 Windows Plesk shared hosting server, and 2 backup servers**, ensuring high availability of web, email, database, DNS, and backup services
- Performed structured root cause analysis for Linux hosting incidents by analyzing system logs, service status, resource utilization, and networking components, while supporting customer migrations, SSL/TLS, DNS, and production hosting operations

Hashroot Pvt. Ltd.

Apr 2025 – Jun 2025

Linux Server Admin Intern

Kochi, Kerala

- Administered AlmaLinux and Ubuntu servers, deploying Apache, NGINX, SSL, virtual hosts, and firewall configurations across **15+ lab environments**
- Migrated 10+ WordPress sites** with DNS configuration, MySQL/MariaDB management, backup restoration, and CMS hardening
- Managed **25+ domains** using WHM, cPanel, and Plesk, configuring AutoSSL, PHP, cron jobs, and resolving web, mail, and database issues

SELF PROJECTS

Production-Grade AWS Infrastructure Deployment

- Tools used: EC2, VPC, Auto Scaling, ALB, Bastion Host, Ubuntu Server, Python*
- Deployed a highly available Python web application on AWS using a secure VPC architecture with public/private subnets, Auto Scaling Groups, Application Load Balancer, NAT Gateway, and Bastion Host.

Compiled LAMP Stack & WordPress Hosting

- Tools used: Apache2 4.64, PHP 8.3.7, MySQL 8.4.0, Ubuntu 22.04, WordPress*
- Compiled and configured a complete LAMP stack from source (without package managers) on Ubuntu, and deployed WordPress with domain simulation and port 80 hosting

Centralized Log Monitoring with Splunk

- Tools used: Splunk Enterprise, Universal Forwarder, FortiGate VM, Apache2, VMware*
- Deployed Splunk in a lab environment to collect and analyze logs from Apache and FortiGate, configured universal forwarders, custom indexes, field extractions, and built dashboards for system event visibility and alerting

EDUCATION

MG University

Sept. 2021 – Oct. 2024

Bachelor of Science in Cyber Forensics

Kochi, Kerala

DHSE

Jun. 2019 – Mar. 2021

Higher Secondary in Computer Science

Kochi, Kerala

CERTIFICATIONS

- AWS Certified Cloud Practitioner (*Foundational 101*)
- Certified SOC Analyst v1
- ISO/IEC 27001:2022 Lead Auditor
- Qualys Vulnerability Management
- CompTIA ITF+

SKILLS

Operating Systems: Linux (Ubuntu, AlmaLinux, CentOS, CloudLinux), Windows Server

Virtualization: KVM, OpenVZ

Hosting Platforms: WHM/cPanel, Plesk, SolusVM

Web Servers: Apache HTTP Server, NGINX

Cloud: AWS (EC2, VPC, Auto Scaling, Application Load Balancer, IAM, S3)

Databases: MySQL, MariaDB

Monitoring & Logging: Grafana, NodePrism, Splunk, System Monitoring, Log Analysis

Networking & Security: DNS, SSL/TLS, TCP/IP, Firewall Configuration, Backup & Recovery

Containers: Docker

Scripting: Bash

Core Administration: Linux Administration, Command-Line (CLI), Service Management, Package Management, User & File Management, Production Troubleshooting

Soft Skills: Root Cause Analysis, Technical Documentation, Customer Communication, Team Collaboration, Time Management, Ability to work under pressure
